RULES
In Legends, each player plays the part of one or more characters who go adventuring. You can play solitaire, or with other of players. In group play, one player is the game master (GM). The GM reads the instructions aloud and carefully logs the party's progress and game time.

CHARACTERS
Each character possesses three attributes: Strength, Dexterity and Intelligence.
Strength (ST)
Strong characters inflict/survive more damage.
Dexterity (DX)
Agile characters can better attack and dodge.
Intelligence (IQ)
Intelligent characters can better apply skills.
New Characters
Unless the adventure specifies otherwise, new characters start with ST8, DX8, IQ8, and eight discretionary points (32 total). Characters begin with four points of skills, two of which can be combat skills. Magic characters begin with four points of spells and skills.

DOING THINGS
Passing a Check
A character hits a foe by passing a three-die DX check (3/DX). The player rolls three six-sided dice (3d6) and totals the results. If the total is the character's DX or less, he hits. If not, he misses. If he hits, roll damage (see Damage).
Example
Ajax (DX11) rolls a one, three and six for a total of 10. This is his DX or less, so he hits Hector.
Checking ST or IQ
A character checks 3/ST to accomplish a physical feat, or 3/IQ for a mental one. A four-die check is abbreviated 4/ST, 4/DX, or 4/IQ.
Winning a Check
Both players roll as many dice as they choose. The higher total wins. If the total exceeds the character's attribute (+skill), the character fails.
Example
Ajax (ST12) grapples Hector (ST11). Ajax rolls three dice, Hector, three as well. Ajax rolls a 13 and Hector rolls a 9. Ajax's total is higher, but 13 exceeds Ajax's ST12. Hector wins ST.

PLAYING THE GAME
Initiative
On the first turn of a battle, each side rolls one die. The side rolling the higher die moves first. Players alternate turns for the rest of the battle.
Surprise
An adventure may specify that one side has surprise. The side with surprise gets one free unopposed turn, and then takes the first turn.
Player's Turn
The player taking his turn moves each of his characters, in any order, one at a time. He must complete one character's turn before proceeding to the next. When he is done, the following player begins his turn.
Character's Turn
A character may move up to his movement allowance (MA), which is half his DX rounded down. He may then execute ONE action.
Example
Ajax (DX11) moves five spaces and attacks.
Space
Only one character can occupy a space, unless grappling a foe. Multiple small animals can occupy a space. A character must stop upon entering an enemy's space (see Tackle).
FIGHTING
Attacker
An attacker can attack ONE foe per turn. He can strike, shoot, tackle, or grapple a foe. An attacker cannot move after his attack.
Defender
A defender can react to ONE attacker, but loses his next turn. He can dodge, counterattack, or tackle his attacker.
Strike
You hit an adjacent foe by passing 3/DX.
Example
Ajax (DX11) rolls a 2, 3, and 4 for a total of 9. He hits Hector and rolls damage.
Dodge
A defender dodges by passing 3/DX. He must then move to an empty adjacent space, or he cannot dodge. He can see the attacker's hit roll, but not damage roll, before deciding to dodge. A defender cannot dodge a missile weapon.
Example 1
Ajax (DX11) rolls 11, striking Hector. Hector (DX12) must dodge, or he will be hit. He rolls 9, and dodges into an unoccupied adjacent space. Hector loses his next turn.
Example 2
Ajax (DX11) rolls 11, striking Hector. Hector (DX12) rolls, and fails to dodge. Ajax rolls damage, and Hector loses his next turn.
Counterattack
A defender surviving an attack may immediately counterattack by striking or shooting his attacker. He hits by passing 3/DX. If he hits, roll damage.
Example
Ajax (DX11) rolls 11, strikes Hector, and rolls damage. Hector survives and counterattacks, rolling 7. Hector hits Ajax and rolls damage, but loses his next turn.
Legends of the Ancient World

Shoot/Throw
An attacker with a missile or throwing weapon hits an unobstructed foe by passing 3/DX. If he hits, roll damage. A shooter cannot move in the turn he shoots, but a thrower can.

Example
Ajax (DX11) shoots at Hector. He rolls 7 and hits. He rolls damage. Hector survives and counterattacks, rolling 11. Hector hits Ajax and rolls damage, but loses his next turn.

Range
Missile range exceeds the playing board. Throwing range is the thrower's ST in spaces. A thrower must recover his weapon from the target space before reuse.

Tackle (to grapple)
A character enters a foe's space. If the character wins DX, he grapples his foe. If he fails but is stronger, his foe must move to an empty adjacent space. If he fails and is weaker (or the same), he returns to his starting space.

If the defender has yet to move, he may first counterattack, doing an extra die of damage.

Example 1
Ajax (DX11), enters Hector's (DX12) space. Ajax rolls 11, Hector rolls 8. Ajax wins. They are now grappling.

Example 2
Ajax (ST12, DX11) enters Hector's (ST11, DX12) space. Ajax rolls 3, Hector 12. Ajax fails, but he is stronger. Hector must exit into an empty adjoining space, or Ajax will grapple him.

Example 3
Hector (ST11, DX12) enters Ajax's (ST12, DX11) space. Hector rolls 13, Ajax 9. Hector fails. Hector is weaker. He must retreat back to his starting space.

Example 4
Ajax enters Hector's (DX12) space. Hector first counterattacks, rolling 12. He hits Ajax doing an extra die damage. Ajax survives, and wins his tackle roll. Both characters are now grappling.

GRAPPLING

Grappling Options
Grapplers only fight foes in the same space. The grapper winning ST can: (1) Roll damage on his foe; (2) Exit into an adjacent empty space; or (3) Drag his foe one space. Unarmed attacks negate armor. A grapper with 2x ST of his foe moves and acts normally, carrying his foe.

Example 1
Ajax (ST12) grapples Hector (ST11). Neither is armed. Ajax rolls 12, Hector 9. Ajax wins and rolls damage on Hector. Ajax rolls 2, but adds 1 since he is stronger. Hector suffers 3 fatigue.

Example 2

Example 3
Ajax (ST12) grapples Hector (ST11). Both roll 8. Ajax wins. He drags Hector one space.

Outside Attacks
Characters attacking into a grappling space automatically hit and roll damage.

NOTES

Change Weapons
A character takes a turn to change or pick up a weapon. He cannot move in this turn.

Zone of Control
If an attacker tries to move around or past adjacent defenders without attacking or entering their space, the defenders may counterattack or tackle the attacker without being hit.

INJURY & EXHAUSTION

Injury is measured in damage points; exhaustion is measured in fatigue points. Both are cumulative. When a character accumulates a combination of damage and fatigue equal to his ST or more, he is immediately incapacitated.

Damage
When all combat is over, characters suffering damage equal to their ST or more must be healed to a net ST of at least one point. If not, they die. Characters sustaining twice their ST or more in damage are unrecoverable.

Fatigue
Fatigue counts towards incapacitation but not death. A fatigue point dealt to an incapacitated character is a damage point. A character recovers one fatigue point after each encounter, and all his fatigue with a full night of sleep.

Recovery
Between adventures, characters recover fully. During play, a character fully recovers in a week, provided: (1) he remains in one location, (2) has adequate shelter, (3) is fully provisioned, and (4) participates in no combat or any other activity.

WEAPONS

Damage (D)
A character hitting a foe rolls the number of dice indicated by his weapon's damage rating. He then adds or subtracts any modifiers. This total is the number of damage points he delivers (minimum of one).

Example
Ajax hits Hector for 2d6-1 damage. He rolls a five and two, inflicting six points (5+2-1=6).

Heft (H)
A weapon's heft is the minimum ST required to use the weapon.

(T) This weapon can be thrown.
(U) D3 fatigue, (+1 if the attacker is stronger).

**ARMOR**

**Armor (A)**

When a character is hit, reduce the damage he suffers by the cumulative rating of his armor.

**Example**

Hector takes six damage points, but his armor stops three. He takes three damage (6-3=3).

**Restriction (R)**

Adjust a character’s DX down by the cumulative restriction of his armor. This also affects MA.

**Example**

Hector's (DX12) armor has a restriction of two. His adjusted DX is 10 (12-2=10). His MA is five.

---

**CAMPAINING**

**Experience Points (XP)**

Characters use XPs to buy skills, magic and ST/DX/IQ points. After each combat, every character contributing to victory gets one XP if all enemies are killed, captured or routed. Characters get no XP if they flee. Additionally, when a party acquires a plotword, each character gains one XP.

**Advancement**

A character raises his ST/DX/IQ by spending XPs equal to the next level. He raises a skill one point by spending 10XP or 20XP for a spell. A mage spends 10XP for a spell, or 20XP for a skill level. A character may increase an attribute or skill during play, but can only learn new skills and spells between adventures.

**Example**

An IQ11 character spends 12XP to get IQ12, but spends 10XP to increase a skill one point.

**Karma/Wish**

A character expends a karma point to re-roll one set of dice. A character expends a wish to negate all damage, even if he was just "killed." A character can use a wish as a karma point, or a karma point as one XP. Unexpended karma, wishes and XP roll over to future adventures.

**XP Penalties**

A character lacking sufficient XP to pay an XP penalty must reduce his highest attribute to make change. In return, he receives what he paid for the attribute in XP.

**Example**

A character has ST13 DX11 IQ10. He must pay a 5XP penalty, but currently has no XP. He reduces ST13 to ST12, getting 13XP. He pays 5XP and has 8XP remaining.

**Curse**

A cursed character adds or subtracts one against all his checks and damage rolls, worsening the result. He can lift the curse by expending one wish, three karma points, or 10 XP. Curses are cumulative.

**SKILLS**

To use a skill, a character must pass a three-die check against his applicable attribute: 3/ST, 3/DX, 3/IQ (see Skill Tables).
**Required Skill Checks**
Some skills require that the character already know the skill to attempt the check. Adventures indicate this by using the word “against.”

**Example**
“On passing 3/ST against SWIMMING, Ajax swims ashore.”

**Assisted Skill Checks**
Sometimes the skill improves the character’s chance of passing, but is not a prerequisite. Adventures indicate this by using a plus sign.

**Example**
“On passing 3/ST+CLIMBING, Ajax scales the wall.”

**MAGIC**
A mage can cast a spell instead of attacking. He succeeds by passing 3/IQ. A direct spell, however, requires the mage to win IQ against his target. A mage cannot move in the turn he casts a spell. A mage can only cast into a space with a clear line of sight. A mage can only cast spells instead of eating a daily ration on 3/IQ.
Direct Spells
A direct spell is cast directly upon a person. A mage can cast a direct spell or a magic strike as his counterattack to a tackle.

Dynamic and Static Spells
Dynamic spells are single-use; static spells remain in play for the duration of the encounter. Static spells cannot be stacked—casting the same spell on a target yields no additional effect.

Fatigue
A magic user suffers fatigue upon successfully casting a spell (see Injury & Exhaustion). Fatigue costs appear in the spell tables.

Multi-Space Spells
A character knowing a multi-space spell automatically knows all lesser versions of that spell. Likewise, a character learning a lesser-space spell automatically knows the greater-space version when his IQ gets to the appropriate level.

Staffs/Wands
A mage can carry a staff or wand, which can be any piece of wood. The staff/wand absorbs fatigue for the mage—until it is depleted.

Charging Staffs/Wands
A depleted staff/wand recharges overnight. New staffs start with zero capacity. A mage permanently increases his staff's capacity by using 2XPs for a point of capacity. A mage can the capacity of his staff/wand up to his IQ.

Metal Armor
Magic users cannot cast spells when wearing metal armor. Metal armor is useless against a fireball or lightning attack. Characters wearing metal armor suffer an additional die of damage from lightning.

CREATION (Static)
Creation magically creates physical objects in target spaces.
